STATE OF ILLINOIS DEPARTMENT OF TRANSPORTATION

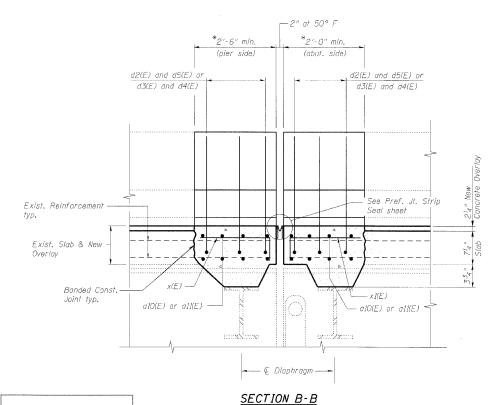

EXISTING PARAPET SECTION

Notes:

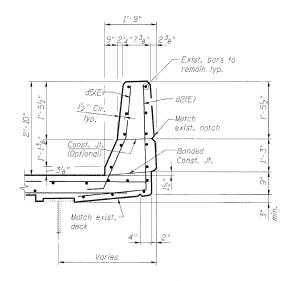

- 1. Existing reinforcement bars extending into the concrete removal area shall be cleaned, straightened and incorporated into the new construction. Any reinforcement bars that are damaged during concrete removal shall be replaced with an approaved bar splicer or anchorage system. Cost included with Concrete Removal.
- 2. Existing reinforcement bars in the concrete removal area parallel to the expansion joints shall be removed.
- 3. Removal and disposal of the existing expansion joints will not be paid for separately, but shall be included with the cost of Concrete Removal.
- 4. The Contractor shall excercise extreme care with the existing conduits in sections of the parapet to be removed and to protect and support the conduit. The Contractor will be required to repair any damage done to the conduit to the satisfaction of the Engineer. No splicing will be allowed to any cable damage resulting from this work, instead the Contractor will be required to repair the entire span of any damaged cable at no additional cost to the Department.
- 5. Work this sheet with Expansion Joint Repairs sheet.

SECTION A-A

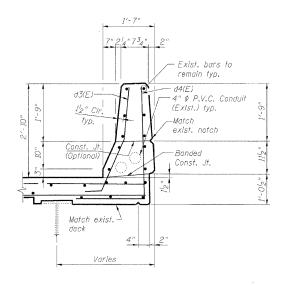

🗕 🖟 Diaphragm 🛶
